Region X

Subject: THE SPACE SCIENCE ROADSHOW in all public and private preschool, elementary and high schools in Region X for the Academic Year 2015-2016

Dear Atty Chatto:

Astronomy is dynamic and ever-changing. Astronomers around the world are working to further our knowledge. In 2010, we launched as Astronomy Awareness Program nationwide that inspired many students and encouraged them to start reaching for their stars by arousing their interest and curiosity about the wonders and intricacies of the universe and encouraging them to pursue a highly laudable career track in space science and technology.

Now is the perfect time to learn more about the universe as there are lots of space missions and celestial events to look forward to. Conducting this Space Science Strategic Development Program will be beneficial and definitely entertaining for students. We work closely with business, government and academic leaders to develop an initiative that would expand access to state-of-the-art teaching tools, new programs and bolder experiences in bringing Math and Science to life.

The following are the activities for THE SPACE SCIENCE ROADSHOW – a totally entertaining, informative and exciting school-based program suitable for all levels from preschool, elementary and high school.

SPACE DOME (Digital Mobile Planetarium)

A simulated display of the day and night-time sky and celestial objects that engages the students in a personal sense of wonder and discovery in a unique digital environment.

FILM SHOWING

We have a great collection of Astronomy Videos that can be used to aid the students in their quest to understand what lies beyond the unknown universe.

EXHIBIT AND ASK-AN-ASTRONOMER ACTIVITY

Our exhibit features NASA space photos, a collection of authentic meteorites, and optical illusions to introduce the science of visual perception to our students.

NASA SPACE PHOTOS

We have a collection of stunning photographs of the solar system, deep sky objects, space exploration and a lot more.

METEORITE EXHIBIT

This is our collection of authentic meteorites.

OPTICAL ILLUSIONS (The Science of Visual Perception)

These are visually perceived images that differ from objective reality.

ASK-AN-ASTRONOMER ACTIVITY

Our astronomers provide first-rate and easy-to-digest astronomical information to students and teachers. This activity is a combination of curriculum-related material and the latest scientific discoveries (customized at an appropriate level for the age and ability of the students) all under a precise presentation wrapped up in an enthusing, motivational live discussion. Students are given the chance to unveil their innate curiosity and fascination about the universe around us. It's an ask-all, tell-all moment for our budding scientists.

Other Activities (Provided the sky is clear and the weather is good, the following activities may be held)

- **STARGAZING** – all participants gather at night for the actual observation of the night sky using high-powered telescopes designed to provide optimal viewing experience
- **SOLAR VIEWING** – participants get to observe the sun using our special solar telescopes
- **WATER BOTTLE ROCKET MAKING and LAUNCHING** – students enjoy making their own rockets using ordinary water bottles
- **TEACHER TRAINING** – To equip our educators with the necessary tools, knowledge and skills in teaching abstract Astronomical concepts to our students
- Surprise optional activities like parlor games, trivia questions about the film, workshops and other exciting events will surely amaze the students and will make this experience more fun and meaningful to them.

EVENT DURATION

The program runs approximately **two and a half (2 ½) hours** per batch (including digital mobile planetarium show, film showing and exhibit/open forum). Students who opt to join the stargazing activity must secure parent's consent and waiver and will have to stay in the venue from 6 PM until 9 PM.

TARGET DATE OF IMPLEMENTATION

School may choose the most suitable date and time for their students to engage in this educational program. However, reservation must be done at least a month before the school's target date.

In this connection, we would like to request permission and endorsement from your good office to conduct these voluntary, non-compulsory astronomy strategic development activities in public and private schools in Region X. We will work closely with your office to develop a program that meets the Department of Education's mission and vision and to help the students recreate themselves and discover their place in the universe.

Thank you and Mabuhay!

Happy Trails,

JULIUS GALAMITON
Marketing Officer
