International Conference on RESEARCH, INNOVATION AND INVESTMENT 2021

THEME: Emerging Role of Research and Innovation in a Disruptive World

April 28, 2021

DR. VICTORIA V. GAZO
Schools Division Superintendent
Malaybalay City Division

Dear Dr. Gazo:

The University of Science and Technology of Southern Philippines (USTP) will hold the **International Conference on Research, Innovation, and Investment (ICRII)** on May 17-20, 2021 via a web-based video conferencing facility with the theme: *Emerging Role of Research and Innovation in a Disruptive World*.

ICRII features various advances in research and innovation across disciplines. It provides research scientists, industry and government professionals an avenue to discuss and present results of a scientific inquiry, find opportunity to utilize and commercialize research outputs, draw local and international investors of research-based business potentials, and establish research collaboration and linkage relation with institutions or agencies across the globe.

Furthermore, ICRII features scientific lectures on new, relevant topics as well as Innovation and Investment Forum wherein students and faculty pitch their own startup innovation to potential investors. The forum aims to provide the stakeholders an avenue to exchange ideas and discuss the possibility to further develop startup ideas and make them utilizable and commercializable in either early-stage or fertile ecosystem.

We are happy to inform you that a number of teachers from the Department of Education have submitted papers and passed the screening for oral presentation. There will be a virtual recording for the Evaluation of Papers (Q&A) will be from April 30-May 5, 2021 and these will be streamed via Zoom Webinar on May 18-20, 2021.

Corollary to the above, we wish to request for your endorsement for the teachers to participate in this Conference. We look forward to more collaboration with you in the future.

If you have any queries, please contact Ms. Nivea Louwah D. Sermona at icrii@ustp.edu.ph. Thank you in advance for your consideration. .

Sincerely yours,

ISMAEL N. TALILI, DALC
Director for Research, USTP CDO
Overall Conference Chair

International Conference on Research, Innovation and Investment (ICRII) 2021

- **About the Conference**

The International Conference on Research, Innovation, and Investment (ICRII) is an annual gathering of researchers, innovators, investors, policy-makers and other thought leaders to discuss innovative ideas, current and emerging trends, best practices, and other developments in a particular field and pursue a progressive research and innovation ecosystem. The conference will be staged on **May 17-20, 2021** using a virtual platform.

ICRII features various advances in research and innovation across disciplines. It provides research scientists, industry and government professionals an avenue to discuss and present results of a scientific inquiry, find opportunity to utilize and commercialize research outputs, draw local and international investors of research-based business potentials, and establish research collaboration and linkage relation with institutions or agencies across the globe.

Furthermore, ICRII features scientific lectures on new, relevant topics as well as Investment Forum wherein students and faculty pitch their own startup innovation to potential investors. The forum aims to provide the stakeholders an avenue to exchange ideas and discuss the possibility to further develop startup ideas and make them utilizable and commercializable in either early-stage or fertile ecosystem.

Scholarly papers will be selected and published free of charge in Mindanao Journal of Science and Technology (MJST), a scientific journal published bi-annually by USTP and indexed by Scopus and Clarivate Analytics. Excellent research outputs (one paper from each breakout session) will be selected and accorded during the Awards Ceremony.

- **Objectives**

Educational Objective

The conference allows the participants and speakers alike to share information and gain developmental opportunities for research scientists, innovators, and investors from the scientific lecturers, presentations as well as practical workshops and thereby learn from each other.

Social Objective

The conference brings together researchers, innovators, and investors from the academe, industry and government agencies to share new trends, methods as well as innovative solutions to problems. In this way, the participants (or stakeholders) in various transactional dialogues are expected to express their intent to take part in democratizing research and innovation as well as define their role in effectively and efficiently delivering socioeconomic benefits of research and innovation.

Informational/Promotional Objective

The conference provides the participants opportunity to know more about USTP as an institution of science and technology: its vision and mission, strategic goals, social responsibility, flagship programs, expertise as well as role in the society and innovation eco-system.
