**REPORTERS FROM HOME: FIGHTING VACCINE MISINFORMATION
INVITATION FOR SCHOOL PAPER ADVISERS
AND CAMPUS JOURNALISTS**

FYT Media, in partnership with Google Philippines, will conduct a webinar titled **Reporters from Home: Fighting Vaccine Misinformation** on January 28-29.

The two-day virtual event aims to equip student journalists with the knowledge and tools so they can be reporters from home creating content on YouTube aimed at addressing the COVID-19 infodemic and vaccine hesitancy.

Invited speakers include broadcast journalist Atom Araullo, DOH Director Dr. Beverly Lorraine Ho, and UP College of Mass Communication Prof. Yvonne Chua.

Interested participants are advised to register through this link: <https://bit.ly/FYTvaccineMisinformation>, or watch live through FYT's YouTube Channel (<https://www.youtube.com/c/FYTmedia>).

Attached are official communications and poster for ready references.

Dear Secretary Briones,

We are from Lyf Solutions, Inc, a multimedia production company that I co-founded with journalists Atom Araullo, Voltaire Tupaz, and Zak Yuson in 2018. We're behind the independent media outfit FYT, where we tell stories to connect people and to inspire meaningful conversations and social action.

We would like to express our sincere gratitude for the opportunity to organize the workshop on Advocacy Journalism during the National Schools Press Conference (NSPC) in August 2021.

As the Philippines continues to respond to the COVID-19 pandemic, it deals with infodemic or the challenge of an overabundance of information - both accurate and false - about the virus.

However, false information tends to spread more quickly and widely, making it more difficult for the public to identify verified content from reliable sources such as local health authorities, experts, and media.

This poses a serious challenge to vaccination efforts to curb the pandemic.

That is why we partnered with Google Philippines to train campus and community journalists and citizen reporters to create visual content (e.g., video, photos, graphics, multimedia) that corrects false information on COVID-19 vaccination and promotes content that addresses health information needs at the community level. The project will kick off with the production of hyper-local content related to COVID-19 vaccination.

On January 28-29, we are holding a webinar entitled **Reporters From Home: Fighting Vaccine Misinformation**, a two-day virtual event that aims to equip student journalists with the knowledge and tools so they can be reporters from home creating content on YouTube aimed at addressing the COVID-19 infodemic and vaccine hesitancy.

Invited speakers include broadcast journalist Atom Araullo, DOH Director Dr Beverly Lorraine Ho, and UP College of Mass Communication Prof. Yvonne Chua.

Google News Initiative Teaching Fellow Trinna Leong will also be sharing how to maximize existing online platforms to combat misinformation and disinformation in the community. This event will be livestreamed via FYT's YouTube channel and certificates of participation will be distributed..

Interested participants may register through this link: <https://bit.ly/FYTVaccineMisinformation>

In this regard, we are respectfully seeking your endorsement for our event to encourage more students and teachers to participate and enhance their critical thinking and content creation skills in a time of pandemic and infodemic. We are hoping to gather at least 3,000 registered participants from the 17 regions in the country.

Again, we thank you for your continued support for our shared advocacy. We are hoping for your favorable consideration regarding our request.

Respectfully,

RUPERT AMBIL
CEO and Co-founder
FYT Media

FYT Media, Google go local to fight vaccine misinformation

Student and community journalists across the country will gather to tackle misinformation on COVID-19 vaccine in a free webinar from January 28 to 29, 2022 at 10:00AM - 12:00NN. This will be streamed live on [FYT's YouTube channel](#).

Dubbed "#FYTCOVID19: Fighting vaccine misinformation," the online event is a fact-checking initiative of the independent media outfit FYT supported by Google Philippines.

As the Philippines continues to respond to the COVID-19 pandemic, it deals with infodemic or the spread of false or inaccurate information about the virus and vaccine.

Experts from the health sector, the academe, and Google will speak at the event which will be headlined by FYT Media co-founder and broadcast journalist Atom Araullo.

"Hinihikayat ko kayong makinig sa payo ng mga doktor at mga eksperto, at huwag magpadala sa fake information na kumakalat sa social media o sa ating mga komunidad," Araullo said, inviting community reporters and citizen journalists to join the timely conversation.

(I urge everyone to take the advice of doctors and experts, and to be mindful of fake information that spreads on social media or in our communities.)

There is an urgent need to bolster fact-checking efforts around COVID-19 vaccine information at the local level and support journalists from community, national, and mainstream media.

"Google is committed to working closely with the media, partners, and communities to help fight misinformation. This webinar, together with FYT Media, will pave the way for opportunities to improve the skills of student and community journalists in telling stories that help combat COVID-19 and vaccine misinformation at the community level," said Mervin Wenke, who leads Communications and Public Affairs for Google in the Philippines.

Student and community journalists must register [here](#) to attend the webinar. FYT Media and Google will select 10 student and community journalists that both organizations will support beyond the webinar so they can learn more skills about fact-checking and building content on YouTube.

Recent data from the [Department of Health](#) shows that 49.8 million Filipinos - about 45% of the population - have already been fully vaccinated against COVID-19. According to a [report](#), cities and municipalities including Taguig, Pateros, and Manila have already begun the preparations for the vaccination of children aged five to 11 which could start soon.
